

ERP Needs Assessment

A comprehensive needs assessment lays the foundation for a successful ERP implementation. Impact North dives deep into the unique needs of your business including timing, cost, hard and soft benefits, and change management risks. By starting off with a strong needs assessment, your ERP implementation is bound for success.

NEEDS ASSESSMENT

A thorough needs analysis is completed with questionnaires and interviews.

There are a lot of options out there. At Impact North, we weed through them for you to present what works and why - as well as what doesn't work and why. This ensures you make an informed decision for you and your business.

STEP 2

SELECTION

Channel partners are selectively chosen that fit your unique business needs.

We take care of the tedious tasks for you by contacting vendors, collecting requirement documents, analyzing RFIs, scheduling demos and guiding you through the complex selection process.

STEP 3

IMPLEMENTATION

Expert client guidance is provided to ensure you stay on time and on budget.

We advocate for your best interests, ensuring your project budget, scope, and deadlines are kept at the forefront by your implementation team.

ERP Needs Assessment Deliverables

- Current software analysis
- A comprehensive list of software solutions that includes total cost
- Business case analysis with benefits and cost impacts of a new ERP software system
- A detailed roadmap outlining the entire ERP implementation process
- Change management assessment to evaluate potential issues within your organization and mitigation tactics
